Exam : **VCS-279**

Title : Administration of Veritas
NetBackup 8.1.2 and
NetBackup Appliances 3.1

Vendor : Veritas

Version : DEMO

NO.1 What must be confirmed during an interactive installation or upgrade to ensure certificate deployment is secure?

- A. the admin/root password of the master server
- B. the SHA1 fingerprint of the certificate authority (CA)
- C. the Hostname of the master server
- D. the MD5 fingerprint of the certificate authority (CA)

Answer: D

NO.2 Which command should an administrator use to generate a list of all files backed up on a client for a specific backup job?

- A. bpimagelist
- B. bpimage
- C. bplist
- D. bpdjobs

Answer: C

NO.3 In which scenario is "Use Accelerator" unavailable in a backup policy?

- A. for a NetApp NDMP filer
- B. for an Exchange database availability group (DAG)
- C. for VMware virtual machines with a Linux guest OS
- D. for virtual machines hosted on a Hyper-V Host using WMI

Answer: B

NO.4 Which type of backup schedule is available when using the "After each backup session" schedule type for an NBU-Catalog policy type?

- A. Full
- B. Differential Incremental
- C. Vault Catalog Backup
- D. Application Backup

Answer: B

NO.5 An administrator has a scheduled policy that backs up 20 clients, each with multiple mount points and multiple data streams enabled. One of the jobs has failed and is in an Incomplete state in the Activity Monitor.

How should the administrator verify the incomplete job runs prior to the next scheduled backup?

- A. resume the job
- B. run a manual job for the mount point
- C. run a manual job for the client
- D. resume the parent job

Answer: A

NO.6 An administrator is comparing the NetBackup Accelerator and NetBackup FlashBackup features to determine which feature should be used for backup of a very large file system with millions of files

Which consideration is irrelevant when determining whether to use NetBackup Accelerator or NetBackup FlashBackup in the situation?

- A. the type of file system being used
- B. the file system change rate
- C. the file system folder depth
- D. the file system storage capacity

Answer: B

NO.7 An administrator is attempting to configure a new backup policy using synthetic backups. When creating a new full backup schedule, the Synthetic backup option is greyed out and therefore unable to be selected.

What must the administrator do to the policy to make the Synthetic backup option available for selection?

- A. select a backup destination that supports synthetic backups
- B. create a full backup schedule with Accelerator forced rescan enabled
- C. enable Collect true image restore information with move detection
- D. create a differential or cumulative incremental backup schedule

Answer: C

NO.8 What is the certificate deployment and management behavior when the security level is set to High?

- A. Certificates are deployed automatically for known hosts and the Certificate Revocation List (CRL) is refreshed every hour.
- B. Certificates are deployed automatically for all hosts and the Certificate Revocation List (CRL) is refreshed every hour.
- C. Certificates are deployed automatically for known hosts and the Certificate Revocation List (CRL) is refreshed every 4 hours.
- D. Certificates are deployed with a token for all hosts and the Certificate Revocation List (CRL) is refreshed every 4 hours.

Answer: C

NO.9 Where can an administrator add or list the service providers for cloud storage?

- A. NetBackup Management > Host Properties > Media Servers > Scalable Storage
- B. NetBackup Management > Host Properties > Master Servers > Cloud Storage
- C. NetBackup Management > Host Properties > Master Servers > Scalable Storage
- D. NetBackup Management > Host Properties > Media Servers > Cloud Storage

Answer: B
